

Alexander Ndungu Kangethe

Computer Science Student · Software Engineer

Nairobi, Kenya · ndungukangethe22@gmail.com · github.com/AjMotion

PROFILE

Computer science student based in Kenya. I design and ship products at the intersection of civic information, public procurement, and financial markets. I care about clean systems, small surfaces, and software people can trust.

SELECTED PROJECTS

Kaa Rada — Civic education platform

Founder & Engineer · 2025–Present

A civic platform that explains the laws of Kenya and the voting process in language anyone can read. Built to make democracy legible.

Tender Alerter — SaaS notification system

Founder & Engineer · 2025–Present

Monitors government and corporate tenders and notifies subscribers when matching opportunities go live.

Trading Platform — Live market intelligence

Founder & Engineer · 2025–Present

Aggregates live prices, market news and instrument metadata so retail traders can act on real, current information.

EDUCATION

BSc. Computer Science

Undergraduate · Kenya

TECHNICAL SKILLS

Languages	TypeScript, Python, JavaScript, SQL
Frameworks	React, Next.js, Node.js, TanStack
Data	PostgreSQL, REST APIs, Web Scraping
